

PRIYA PARMAR

SOFTWARE DEVELOPER | FULL - STACK DEVELOPER

Ahmedabad, India • +91 9081637267 • thepriheaparmar@gmail.com

github.com/PriheaParmar • www.linkedin.com/in/prihea • <https://prihea-portfolio.vercel.app/>

PROFESSIONAL SUMMARY

Software Developer with hands-on experience delivering 2 startup products and building responsive web applications, backend modules, REST APIs, and database-driven systems. Strong foundation in JavaScript, Python, Java, SQL, data structures, OOP, DBMS, and software engineering. Experienced in React.js, Next.js, Node.js, Express.js, Flask, Django, MySQL, MongoDB, Firebase, and collaborative Agile development.

TECHNICAL SKILLS

Languages: JavaScript (ES6), TypeScript, Python, Java, PHP, SQL, C++,

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery, GSAP

Backend: Node.js, Express.js, Flask, Django

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Firebase

Tools & Platforms: Git, GitHub, Postman, VS Code, PyCharm, IntelliJ IDEA, Jupyter Notebook, Figma

Cloud & APIs: REST APIs, Google Gemini API, OpenAI API, Firebase Authentication, Cloud Firestore, Render, Vercel, Netlify

PROFESSIONAL EXPERIENCE

Invent Tech — Software Developer

Remote | Jan 2026 – Present

- Delivered 2 startup products - a branding website and an ERP application - supporting both digital presence and internal operations.
- Built a multi-section branding website with responsive layouts, polished visual sections, and front-end interactions to present services and strengthen online visibility.
- Developed ERP functionality using Python, Flask, JavaScript, and database-driven workflows to centralize 3 core processes: record management, textile workflow tracking, and operational data handling.
- Converted evolving startup requirements into production-ready features across 2 products through iterative development, debugging, and UI/backend refinement.

Devam Technologies — Web Developer

Ahmedabad, India | Jun 2025 – March 2026

- Build and deploy interactive web applications across multiple responsive pages and reusable UI components using HTML, CSS, JavaScript, React.js, and modern front-end frameworks.
- Collaborate with backend and design teams to deliver feature updates, improve usability, and support performance-focused front-end releases.
- Integrate REST APIs and develop modular components that improve maintainability, reduce repetitive UI work, and support scalable feature development.

Devam Technologies — Web Developer Intern

Ahmedabad, India | Dec 2024 – May 2025

- Developed responsive front-end modules and reusable components across multiple UI workflows to support faster development and consistent interface behavior.
- Assisted in debugging, cross-browser testing, and code review workflows to improve release stability and reduce UI inconsistencies across devices.
- Supported UI optimization by refining workflows, improving responsiveness, and reducing avoidable front-end overhead during feature delivery.

DGP Investigation Agency — Web Developer Intern

Ahmedabad, India | Apr 2024 – Jul 2024

- Built internal web interfaces and backend modules using Python, PHP, and MySQL to support 3 key workflow areas: data entry, authentication, and internal operations.
- Implemented secure authentication logic and structured database interactions for accurate data handling and reliable record access.
- Improved application stability and performance through debugging, issue resolution, and targeted optimization of backend and interface modules.
- Translated stakeholder requirements into deployed web solutions while coordinating with internal teams on functionality, testing, and delivery.

SELECTED PROJECTS

Happinest | Nov 2025

- Built an interactive web application that enabled users to join shared virtual rooms and celebrate birthdays online.
- Implemented 3 engagement features — virtual cakes, wishes, and real-time animations — using a dynamic frontend and cloud-backed data storage.

Candy | Sep 2025

- Built an automation tool to manage 4 job-search workflows: resume tracking, application status, interview scheduling, and reminder planning.
- Designed the system using Python, Flask, JavaScript, REST APIs, and SQLite to centralize application data and reduce manual tracking effort.

Legal Bot – AI Legal Assistant | Feb 2025

- Created an AI-powered chatbot that generated real-time responses for legal queries.
- Integrated 3 core layers — Google Gemini API, Flask backend, and MongoDB storage — to process, store, and retrieve user query data efficiently.

Euphoric | Sep 2025

- Developed a productivity-focused Chrome extension for study sessions with timers, note-taking tools, and productivity analytics.
- Combined 4 productivity features — timers, notes, analytics, and structured sessions — using JavaScript, Chrome APIs, HTML, and CSS to support focused study workflows.

Portfolio Website | Apr 2025

- Designed and developed a responsive personal portfolio website to showcase projects, technical skills, and professional experience.
- Built with modern web technologies and reusable UI components to improve navigation, recruiter accessibility, and project visibility.

EDUCATION

Silver Oak University — Bachelor of Computer Applications (BCA)

Ahmedabad, India | 2022 – 2025 | CGPA: 9.19

Relevant Coursework: Programming Fundamentals (C/C++), Object-Oriented Programming (Java), Data Structures & Algorithms, Database Management Systems, Web Technologies, Operating Systems, Computer Networks, Software Engineering, Mobile Application Development, Cloud Computing & Emerging Technologies

CERTIFICATIONS

- CS50's Introduction to Programming with Python — Harvard University
- Young Python Professional — Infosys
- Introduction to Generative AI Learning Path — Coursera
- Participation: Souvathon Hackathon — Silver Oak University
